MSWO Preference Assessment Data Sheet

Multiple-stimulus without replacement · RBT task B.1 · Run as written in the protocol from your supervising BCBA

Client initials/ID _____ Date _____

RBT initials _____ Supervisor initials _____

Item category _____ Access time per choice _____

Sampling done before trial 1 ☐ Motivation notes (last meal, sleep, recent access) _____

1. Items (one category per assessment)

Code	Item	Code	Item
A		D	
B		E	
C		F	

2. Trials: write the code of the item chosen; that item stays out for the rest of the session

Session 1 start time: _____

Trial	Item chosen (code)	No choice
1		☐
2		☐
3		☐
4		☐
5		☐
6		☐

Session 2 start time: _____

Trial	Item chosen (code)	No choice
1		☐
2		☐
3		☐
4		☐
5		☐
6		☐

Session 3 start time: _____

Trial	Item chosen (code)	No choice
1		☐
2		☐
3		☐
4		☐
5		☐
6		☐

3. Summary: rank = the trial on which the item was chosen

Code	Session 1 rank	Session 2 rank	Session 3 rank	Sum	Mean rank (sum ÷ sessions)	Final rank
A						
B						
C						
D						
E						
F						

Steps

1. Let the learner sample each item briefly. Place all items in a row in front of the learner and give the same instruction every trial (for example, "Pick one").
2. Record the code of the first item the learner chooses, give access for the set time, then keep that item out.
3. Rearrange the remaining items as your protocol says and repeat until no items are left or the learner stops choosing. Mark "No choice" and tell your supervisor if choosing stops.
4. Mean rank = sum of session ranks ÷ number of sessions. Lower = more preferred. Report ties and unchosen items to your supervisor; do not break ties yourself.

Notes (problem behavior, refusals, anything unusual)
